Issue 01 — Advance Publication Evidence Register

Africa's Battery Minerals: Can Export Bans Deliver Sustainable Industrialization?

Companion source register · Updated 13 October 2026 · Supersedes the Version 7.0 register; original bibliography retained and supplemented.

> The article is an advance online publication (10 October 2026). Reuters (8 April 2026) and IMF (29 April 2024) sources were checked against their original publications. Selected USGS lithium/nickel production and reserve figures still require final comparison with the original version 1.3 commodity tables. Inclusion in this source list does not imply full independent re-verification.

Source bibliography

1. African Green Minerals Observatory (2025). African Green Minerals Strategy: An explainer. — Open source
2. Al Jazeera (2026, February 25). Zimbabwe imposes ban on exports of all raw minerals and lithium concentrate. — Open source
3. Argus Media (2026, February 11). Indonesia to cut nickel mining quota in 2026. — Open source
4. BloombergNEF (2021, November 24). Producing battery materials in the DRC could lower supply-chain emissions and add value to the country's cobalt. — Open source
5. BPS-Statistics Indonesia (2024, July 1). Persentase penduduk miskin Maret 2024 turun menjadi 9,03 persen. — Open source
6. C4ADS (2025, February 4). Refining power. — Open source
7. CNBC Africa (2026, April 8). Zimbabwe to introduce lithium export quotas [Reuters republication]. — Open source
8. CREA & CELIOS (2024, February 20). Debunking the value-added myth in nickel downstream industry. — Open source
9. European Commission (2023, July 7). EU launches consultation on Enforcement Regulation on Indonesian nickel restrictions. — Open source
10. Fastmarkets (2026, August 12). DRC may reduce cobalt quota if market needs rebalancing, ARECOMS says. — Open source

Evidence-use cautions

- Processed-nickel statistics include intermediates, not solely battery-grade material.
- Control of refining capacity is not equivalent to domestically retained profits.
- Captive-coal capacity is infrastructure; modeled deaths are projections rather than observed counts.
- Cobalt, lithium and nickel output shares describe different commodity markets.
- Export restrictions and processing growth do not establish a causal impact by themselves.
- Material future corrections should be recorded with a revision date and supporting references.
